

The *Empowered* Member

WH

Wright-Hennepin
Cooperative Electric Association
A Touchstone Energy® Cooperative

**2016
Annual Meeting Edition**

Letter to the Membership

From the Board Chair and President & CEO

The path to empowered membership

2015 was an excellent year for your cooperative. As your new Board Chair and President/CEO, we are pleased to say we met our goal of delivering safe, reliable, competitively-priced electricity for our membership.

The next several pages of this annual report demonstrate just how Wright-Hennepin (WH) is performing. You'll see statistics about reliability, rates, power costs, and more. As one example – did you know that as a member of WH, you paid on average at least .25 percent less than an Xcel Energy customer? For the more than half of you on Off-Peak programs, your average advantage over an Xcel customer was 28 percent. And for the 90 percent of you who received a capital credit check or credit in 2015, the average discount over an Xcel customer was 5 percent.

WH continues to maintain competitive rates despite very little growth in electric sales over the past eight years. This means your co-op must spread ever-increasing costs across the same number of sales as in 2008, a significant management challenge. And as the chart on page four shows, we've been quite successful at holding the line on the distribution costs we can control.

Having said that, fully 70 percent of our costs now come from power supply, which WH purchases from two generation cooperatives – Great River Energy and Basin Electric Power Cooperative. In addition, a new regulatory requirement from the Environmental Protection Agency (EPA) called the Clean Power Plan, which aims to reduce carbon emissions, will increase costs further. Consequently, the steady, upward pressure on electric prices will continue for the foreseeable future and WH will strive to keep cost impacts as low as possible for our membership.

At WH, we consider good cost control to be table stakes – the required ante. To earn and keep your trust, we are also committed to deliver all of the following:

- Competitive rates – compared to the other three metro cooperatives and our largest neighbor, Xcel Energy

- Meet all mortgage requirements
- Continuing to achieve top quartile reliability
- Keeping an American Customer Satisfaction Index score of 87 or better
- Ensuring top quartile safety performance

These are ambitious goals in their own right. But we also believe your co-op must deliver more than access to reliable, affordable power – to go beyond table stakes to deliver new value and opportunity to our membership. And the good news is that, as we enter 2016, WH is indeed providing you with more energy services and pricing options than ever before plus a wide variety of related products and services. In short, 2016 is the year of the Empowered Member.

A key way to deliver more options and choices to members while keeping costs down is through WH Holding, which is made up of seven subsidiary businesses (see the list on page four). These businesses provide great products and services to consumers including home security, floor heating, appliance repair and tree services to name just a few. In addition, these businesses absorb cost allocations from the electric cooperative, contributing \$2.5 million in rate relief in 2015 alone.

On top of these, WH will continue to be a leader in offering you additional electric choices and options that reflect your goals and concerns. In 2016, this will include new solar options for residential, commercial and generation power along with the ability to:

- Purchase half-priced energy through several electric Off-Peak programs
- Enroll in MyMeter – which allows you to use the Internet to track and manage your daily energy use
- Purchase renewable energy (either solar or wind)
- Finance products on your bill such as LED light bulbs, which allows you to purchase products in a way that meets your budget

Soon, WH will announce many new rebates

Erick Heinz
Board Chair

Tim Sullivan
President & CEO

available to you for items such as electric water heaters and air source heat pumps – technologies that will save you both energy and money while helping the co-op in the process.

Of course, the ultimate evidence of the empowered member is found in the capital credit check or credit you receive from WH. As you know, capital credits are margins remaining after the co-op's financial requirements are met. If you received your electricity from an investor-owned utility, any money above expenses would go to investors. At WH, it goes back to you, our member-owners. There's simply no better way to demonstrate the cooperative difference and the cooperative advantage than that.

In all these ways, WH is committed to delivering the power, products and competitive pricing you desire. Going forward, you will become even more empowered to make choices customized to your own values, priorities and pocketbook. We look forward to continuing WH's tradition of excellence and service for years to come.

Cooperatively,

Erick Heinz,
Board Chair

Tim Sullivan,
President & CEO

Competitive Performance

2015 residential rates were very competitive

Competitive rates are at the core of our mission. As the graph below shows, Wright-Hennepin (WH) stacks up well against other electric utilities and cooperatives. On top of that, members taking advantage of Off-Peak programs and those who received a capital credit check or refund (more than 90 percent) experienced an even lower price of power. Again, WH's rates were below the state and national average.

And since our goal is to provide power to you at the lowest possible cost consistent with good service, it only makes sense that when WH's revenues exceed expenses, we allocate those margins to our members. In 2015, WH returned \$2.6 million in capital credits to our membership. We also gave you more flexibility to spend that money by distributing a check instead of a bill credit – providing tangible evidence of your stake in WH and the cooperative difference.

Rate competitiveness for 2015

Reliability Performance

WH proved to be reliable once again in 2015

Nobody likes being left in the dark. That's why our line crews do everything in their power to keep the lights on for every Wright-Hennepin (WH) member. But it's just as important to keep you up to date when an outage does occur. WH notifies its members of power outages at their homes through multiple sources, providing estimated times of restoration. Members can also choose to have a text message sent to a mobile device or email address by signing up on the WH website (see link below). So in the event of an outage you're not only alerted to the situation, but also informed when you can expect your power to return. You can even visit our power outage map on the WH website that displays all outages in WH's service area with estimated restoration times. On top of that, you can sign up for Off-Peak notifications if you're on an Off-Peak program, and you can receive energy-use notifications that send an alert any time your energy use reaches a preset threshold of your choosing. So no matter what the case, you are always informed with WH. To sign up for email or text alerts, visit <http://goo.gl/50CBQd>.

Members averaged less than one outage per year

WH's Board of Directors

From left to right: Secretary-Treasurer Dale Jans, District 4, Buffalo; Duane "Butch" Lindenfelser, District 2, Monticello; Donald Lucas, District 8, Maple Grove; Board Chair Erick Heinz, District 9, Corcoran; Chris Lantto, District 5, Annandale; Vice Chair and Chair of WH Holding Timothy Young, District 1, Annandale; Kenneth Hiebel, District 7, Plymouth; Mike Tieva, District 6, Maple Grove; and Burton Horsch, District 3, Howard Lake.

Operation Round Up funds mean everything to recipients

Wright-Hennepin regularly donates funds to local organizations through the Operation Round Up (ORU) program, but you don't always get to see the end result or fruits of a donation. Pictured at right is Samantha Wanner and her mobility assist dog, "Obie," from Can Do Canines, to which ORU donated \$5,000 to place Obie with Wanner in the fall of 2015. Can Do Canines is an organization that places mobility assist dogs with people who have disabilities. Wanner is a 21-year-old resident of Buffalo who suffers from bouts of extreme exhaustion, deep aches, sporadic and quickened heart fluctuations and hypotension from neurological disabilities. When she feels fatigued, the two-year-old yellow Labrador retriever helps her up the stairs or acts as a brace when she stands up. He hauls her laundry and picks up items that she drops. Obie has also given Wanner a greater sense of comfort in public settings, as his special vest carries his companion's medical information. "I would like to thank anyone who has even touched Obie in any way – thrown a ball for him, said 'Hi' to him or even catcalled him as he walked by!" Wanner says. "Every single person who has touched him has impacted him in such a way as to become the dog that he is today – the helper. He's everything to me." Operation Round Up is a program that rounds up members' electric bills to the nearest dollar, and that deductible amount is used for donations to local charities.

WH Holding Company contributions

Wright-Hennepin (WH) owns multiple subsidiary businesses, which are separate from the electric operation. In 2015, WH Holding picked up \$2,515,764 in cost allocations from the electric operation that otherwise would have been collected in members' electric rates. The WH Holding structure also protects the electric cooperative's non-profit status and provides liability protection.

 A wholly owned subsidiary of Wright-Hennepin Cooperative Electric Association WH Security provides retail security alarm systems and monitoring services to thousands of homes and businesses.	 A wholly owned subsidiary of Wright-Hennepin Cooperative Electric Association The WH International Response Center provides around-the-clock wholesale home security monitoring services to 63,330 customers.
 WH Solar provides members with options for purchasing renewable solar energy.	 WH Services provides quality local contractor services such as tree trimming, appliance repair and street lighting.
 A wholly owned subsidiary of Wright-Hennepin Cooperative Electric Association WH Generation offers turn-key installation of on-site electric generators for commercial members.	 WH Holding Investments provides the legal structure for partnership activity.

HEATMYFLOORS.COM

HeatMyFloors.com provides energy efficient underfloor radiant electric heating products to contractors and homeowners across the U.S. and Canada.

Operating Performance

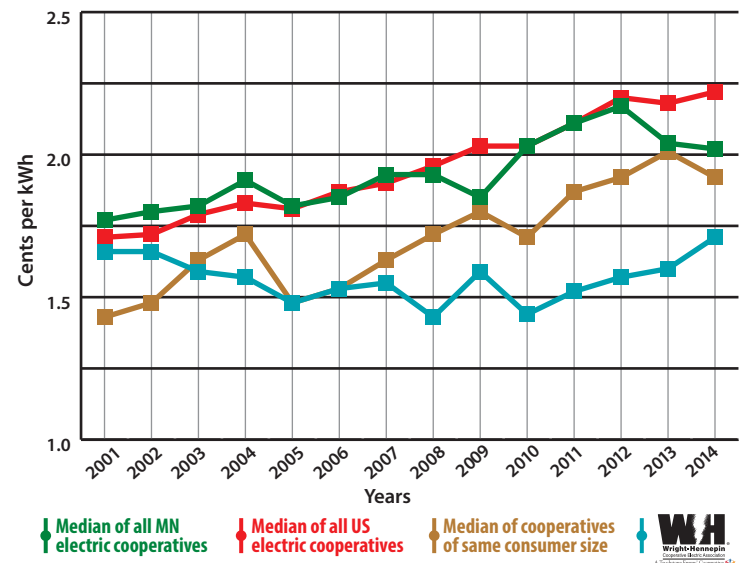

Keeping costs low

By utilizing the most cost-efficient technology in our offices and on the grid, members are ensured that the energy provided to them comes at a fair and competitive rate. Wright-Hennepin (WH) has consistently kept costs below state and national levels as measured on a per kilowatt-hour basis. We've kept total operating expenses level despite the ever-increasing cost of wholesale power. We strive to accomplish all of this, so that the greatest benefactors are you, the members.

WH wholesale power costs and local operating costs

Keeping operating costs lower than other utilities

Notice of Annual Meeting of the Wright-Hennepin Cooperative Electric Association

TO ALL MEMBERS:

Please take notice that the annual meeting of the members of the above cooperative will be held at its headquarters in Rockford, Minnesota at 7 p.m. on Thursday, March 31, 2016, to take action on the following matters:

- I. The reports of officers, directors, and committees.
- II. The election of three directors, one from District 4, one from District 6, and one from District 8. In connection with the election scheduled for this meeting candidates have been nominated pursuant to the bylaws.
- III. Any other business that may come before the meeting or any other adjournments thereof.

Dale F. Jans
Dale F. Jans, Secretary

WH's Vision

To be the preferred energy services company in our marketplace.

WH's Mission

We deliver the power, products and pricing our members demand.

Service Performance

Meeting and exceeding your needs

2015 American Customer Satisfaction Index Scores, compared to other industries

Wright-Hennepin (WH) is pleased to have met your needs in 2015, and you rewarded our efforts to offer the best possible service with high marks on our 2015 American Customer Satisfaction Index survey. We're happy to report that this year's average score of 90 is three points higher than 2014's average of 87. As an electric cooperative, WH strives to give you affordable and reliable power, with programs and options that allow you to manage your pocketbook and choose your energy. We also pride ourselves on offering free services like outage and Off-Peak alerts, as well as MyMeter – a web-based tool that monitors and helps manage your energy consumption.

Members have never had more options

Through WH Solar, electric car rates, home automation services from WH Security, and Off-Peak programs, WH members have never been more empowered than they are today. The world of energy is ever-evolving, and so is your cooperative. WH is proud to offer diverse options that meet every member's energy needs.

- You are able to choose renewable energy offerings and enjoy the advantages of solar power without having to install panels on your home through WH Solar's community solar arrays. Free to select whether to supplement all or just a portion of your energy needs, members can simply test the solar waters or jump right in and choose from three different options to get the right fit for you.
- Electric vehicles (EV) are growing in popularity, so much so that WH installed the first publicly accessible EV charger in its service territory in 2015, and has plans for future installations in 2016. Members also have two special EV rates to choose from when it comes to charging EVs at home. So if saving money and helping the environment is important to you, WH has options.
- Home automation systems can help save on your electric bill by allowing you to control your thermostat, lights and outlets from the palm of your hand. You can also lock your doors and access cameras and your security system, all from a mobile device. It's never been easier to communicate with your home than it is now with home automation systems from WH Security.
- If you're looking for more traditional ways to take control of your energy bill, try one of WH's Off-Peak programs. Whether you're interested in saving on water heating, or home heating and cooling, Off-Peak programs offer half-priced electricity. WH also has a variety of rebates available for those interested in purchasing new energy-efficient equipment.

Environmental Stewardship

One of the several principles guiding electric cooperatives is concern for community. For nearly 20 years, Wright-Hennepin (WH) has played an active role in environmental stewardship in our service area. After a 1997 storm took a costly toll on the area's environment, WH started donating thousands of trees annually to local schools and youth and civic organizations. Since then, WH has donated upward of 200,000 red maple, white birch, Norway spruce, Black Hills spruce and red oak trees.

"Projects like this make Minnesota the community-rich state that we're known for," said Amy Kay Kerber of the Department of Natural Resources. A portion of the donated trees are planted at Lake Maria State Park in Monticello – where WH employees and volunteers have lent a hand with cleaning and maintaining the park each spring for 16 years.

Teaching Electric Safety

Working with electricity every day means we put a premium on safety here at Wright-Hennepin (WH). That's why WH has paired with local schools to teach thousands of students the importance of electrical safety each year. Presentations center on basic electrical safety by depicting true-to-life circumstances appropriate for kids that feature engaging and attention-grabbing demonstrations. "As they learn about (electrical) concepts, students do not always see how it impacts them outside the classroom until it is brought back to them while in school," said Brian Franklin, teacher at Cokato Elementary School. "Having a presentation to make that a full-circle connection enhances learning and understanding."

Dale Jans District 4

Dale Jans, Buffalo, is the incumbent director running unopposed in District 4. He has been a Wright-Hennepin (WH) member for 54 years, certified as a Credentialed

Cooperative Director, and works as a farmer in Chatham Township. He and his wife Karen have four sons and are members of St. John's Lutheran Church in Buffalo, Minn.

Dale has served as secretary/treasurer for 19 of his 23 years on the WH board. He served 33 years on the Centra Sota Cooperative board serving 24 of those years as chairman of the board for that organization. Additionally, he also represents all Minnesota electric cooperatives as a director on the Rural Electric Supply Cooperative's (RESCO) board of directors. RESCO is headquartered in Madison, Wis. and serves utilities in the upper Midwest. Dale was first elected to RESCO's board in 1999 and presently serves on that board's executive committee.

"I welcome the opportunity to continue to serve as Wright-Hennepin's District 4 director. Offering direction to keep rates competitive as well as providing products and services that enhance the well-being of our members in these volatile times will continue to be my priority."

Mike Tieva District 6

Mike Tieva, Maple Grove, is the incumbent director running unopposed in District 6. Mike and his wife Jennifer have been Wright-Hennepin (WH) members for

12 years. Mike is the president and an owner of Northland Mechanical Contractors, Inc. in New Hope, Minn., where he oversees strategic planning, operations, marketing and vision for the commercial and industrial mechanical contracting company. He has been with the company for 29 years.

Mike touts a decade's worth of experience as a management trustee and director for Pipe Trade Services MN, the Minnesota Mechanical Contractors Association, and is currently a director with Heartland Group Insurance Captive. He was appointed to the WH board in September 2015, following the retirement of longtime director Tom Mach. Mike holds a bachelor's degree from Minnesota State University, Mankato in business administration, and is a graduate of the Minneapolis Pipefitters Joint Apprenticeship Training Program.

"I just want to look out for the interests of the members of the cooperative and ensure they're getting the best value they can for the electricity and services provided to them."

Warren Hight District 8

Warren Hight is running for director in District 8. There is no incumbent director. Warren and his wife Sherry live in Maple Grove and have been Wright-Hennepin

(WH) members for 14 years. Warren was CEO of SRT Communications Cooperative where he managed over 200 employees providing telecommunication services to about 50,000 members. As CEO, he successfully built the business into the largest independent telephone company in the state of North Dakota.

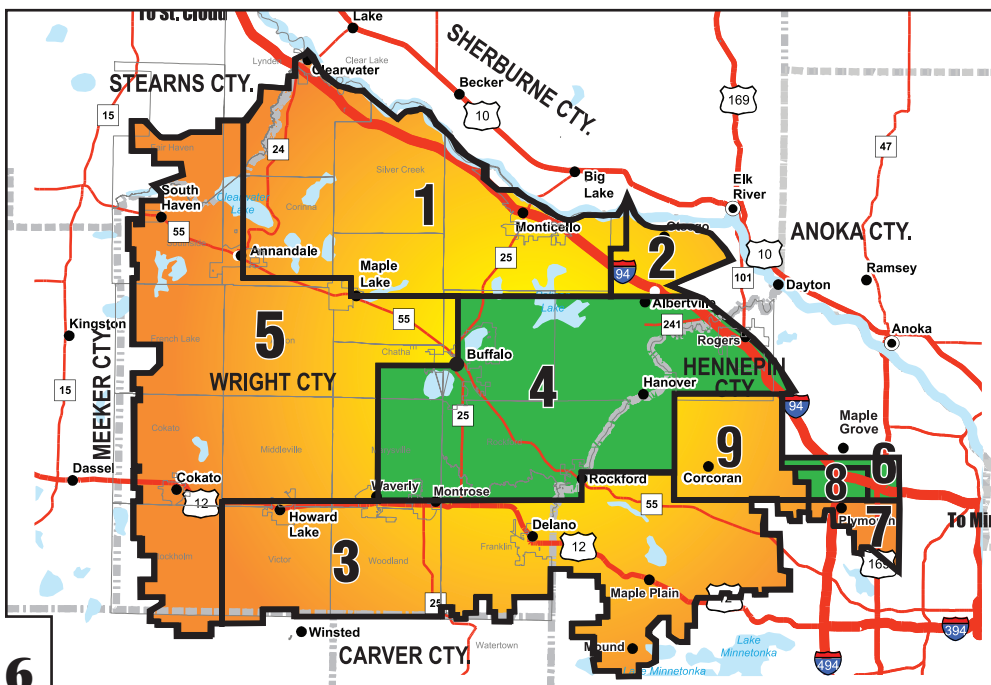

Warren served on the board of directors of Trinity Hospital and held the Chairman's position on numerous industry committees. He was appointed by the WH board of directors to serve on the co-op's telecommunications subsidiary board, which he did for six years. In 2010, he was awarded WH's commitment, leadership, and integrity award. Warren currently serves on the board of directors of TopLine Federal Credit Union. He holds a bachelor's degree from Minot State University.

"As a director I will work with the board to expand green energy technologies, yet always keep reliable and affordable electric services as the number one goal of the cooperative. I am ready to meet the challenge and would appreciate your vote."

Wright-Hennepin service territory

Wright-Hennepin's electric service territory is divided into nine districts, each of which is represented by a board member. The members from each district elect their own director to serve on Wright-Hennepin's board. Directors meet monthly to provide strategic oversight, establish policy and rates, and represent members' voices in the cooperative's operations.

 = Districts up for election

Casey Whelan District 8

Casey Whelan, Maple Grove, is running for director in District 8. There is no incumbent director. Casey and his wife Mary live in Maple Grove and have been Wright-Hennepin

(WH) members for 18 years. Casey is the vice president of LNG Market Development in the Americas for World Fuel Services. He has been employed by the company for three years. He is responsible for development, implementation and execution of LNG fuel services in the Americas. Casey was the vice president of strategic initiatives for U.S. Energy Services for 18 years prior to working for World Fuel Services, which purchased U.S. Energy Services in 2013.

Casey currently serves on the board of directors for Plum Energy and Metro League Hockey. He was a former director for U.S. Energy Services and the Wayzata Youth Hockey Association, and has accrued 21 years of boardroom experience. Casey holds a master's degree in economics from the University of North Dakota, and a bachelor's degree in economics from the University of Minnesota.

"I have over 30 years of experience in the energy industry, much of which is at the executive level. I am at a point in life where I can commit the time and use my experience to provide organizational and strategic direction to Wright-Hennepin."

Consolidated Balance Sheets December 31, 2015 and 2014
