

WH Energy-Saving Electric Vehicle Bring Your Own Charging Station Options

Bring your own charging station

If you are purchasing a different wall mount level 2 charging station, you can choose to participate in one of the following charging options. You cannot switch between the two programs because the metering equipment required is specific for each program.

Option 1: Electric Vehicle Storage Charge Program

- Energy rate during charging time is \$.06434 per kWh.
- Energy rate is not subject to Power Cost Adjustment (PCA).
- Charging time is eight hours per day, generally from 11 p.m. - 7 a.m.
 - Charging is not available all other hours.
- Requires a separate meter socket and receiver to be installed on the outside of home.
- Rebates up to \$500. The EV must be all-electric and have a minimum of 4.5kW charger rating to qualify.

Option 2: Electric Vehicle Time-of-Use Program

- Energy rate varies based on physical location of equipment and time of day.
- Energy rate will not be subject to PCA.
- Charging is available 24/7.
- Requires a separate meter socket to be installed on the outside of home.
- Rebates up to \$500. The EV must be all-electric and have a minimum of 4.5kW charger rating to qualify.

ADDITIONAL REBATE INFORMATION:

Enrollment in an electric vehicle charging program is required to receive rebate.

The CIP rebate is only available on new installations and will be given as a credit on your bill. Rebates will not be applied until final inspection is completed.

Rebate forms may be downloaded at whe.org.

Learn more by talking to a WH representative at (763) 477-3000 or visit WH's website at whe.org.

Rebates are paid on a first-come, first-served basis. Terms and conditions are subject to change.

Please allow six to eight weeks for rebate processing after installation.

Program information applicable through 12/31/2022
