Uncontrolled Ground Source Heat Pump Program

Receive an energy rate of $.099/kWh (not subject to the power cost adjustment) for the electricity your GSHP uses, year round. A backup heating source is not required and your GSHP will not be managed (or turned off by WH). Your GSHP must meet a coefficient of performance of three or better at design conditions.

Other considerations

• The GSHP system must be capable of providing the entire space heating and cooling requirements of the home.
• A backup heating system is not required.
• If you also have plenum or strip heating, these must be separately metered and controlled on a Dual Fuel rate strategy.
• If electricity is your primary source of heating your home, you are eligible to receive a sales tax exemption. Forms can be found at whe.org.
• The Energy-Saving Program (ESP) metering equipment will need to be located outside the home.

Ground Source Heat Pumps

A GSHP is the highest efficiency heating and cooling system available because it uses a renewable energy source: the earth. This system is three times more efficient than the highest efficiency gas furnace and consists of a network of durable plastic coils buried in the ground that absorb the earth's heat energy. A heat pump, which is connected to the coils, extracts that energy and coverts it into heat, which is then transferred in to your home. At the flip of a switch, the process can be reversed to cool your home. GSHPs are long-lasting, low-maintenance systems designed to meet 100 percent of your heating and cooling needs.

2022 REBATES AVAILABLE

1. WH Energy-Saving Program rebate: $125 per ton, maximum of $750 (6 tons)
2. Conservation Improvement Plan rebate: $200 per ton, maximum of $1,200 total (6 tons)

Enrollment in the Uncontrolled Ground Source Heat Pump Program is required to receive rebate. Rebates are available on new installations only. Rebates will be given as a credit on your bill. Rebate forms may be downloaded at whe.org.

Learn more by talking to a WH representative at (763) 477-3000 or visit WH’s website at whe.org.

Rebates are paid on a first-come, first-served basis. Terms and conditions are subject to change. Please allow six to eight weeks for rebate processing after ESP installation.

A state electrical inspection must be completed within 30 days of the metering equipment installation.

Program information applicable through 12/31/2022
