

# WH Energy-Saving Ground Source Heat Pump Program

**Wright-Hennepin (WH) offers an Uncontrolled Ground Source Heat Pump (GSHP) Program that saves you year-round on your energy bill.**

## Uncontrolled Ground Source Heat Pump Program

Receive an energy rate of \$.10500/kWh (not subject to the power cost adjustment) for the electricity your GSHP uses, year round. A backup heating source is not required and your GSHP will not be managed (or turned off by WH). Your GSHP must meet a coefficient of performance of three or better at design conditions.

### Other considerations

- The GSHP system must be capable of providing the entire space heating and cooling requirements of the home.
- A backup heating system is not required.
- If you also have plenum or strip heating, these must be separately metered and controlled on a Dual Fuel rate strategy.
- If electricity is your primary source of heating your home, you are eligible to receive a sales tax exemption. Forms can be found at [whe.org](http://whe.org).
- The Energy-Saving Program (ESP) metering equipment will need to be located outside the home.

## Ground Source Heat Pumps

A GSHP is the highest efficiency heating and cooling system available because it uses a renewable energy source: the earth. This system is three times more efficient than the highest efficiency gas furnace and consists of a network of durable plastic coils buried in the ground that absorb the earth's heat energy. A heat pump, which is connected to the coils, extracts that energy and converts it into heat, which is then transferred in to your home. At the flip of a switch, the process can be reversed to cool your home. GSHPs are long-lasting, low-maintenance systems designed to meet 100 percent of your heating and cooling needs.

## 2023 REBATES AVAILABLE

**1. WH Energy-Saving Program (ESP) rebate: \$125 per ton, maximum per system of \$750 (6 tons)**

**2. Conservation Improvement Plan (CIP) rebate: \$200 per ton, maximum of \$1,200 total (6 tons)**

Enrollment in the Uncontrolled Ground Source Heat Pump Program is required to receive rebate.

Rebates are available on new installations only. Rebates will be given as a credit on your bill.

Rebate forms may be downloaded at [whe.org](http://whe.org).

Learn more by talking to a WH representative at (763) 477-3000 or visit WH's website at [whe.org](http://whe.org).

Rebates are paid on a first-come, first-served basis. Terms and conditions are subject to change.

Please allow six to eight weeks for rebate processing after ESP installation.

A state electrical inspection must be completed within 30 days of the metering equipment installation.

Program information applicable through 12/31/2023
