

WH Energy-Saving Electric Vehicle Charging Program

Wright-Hennepin's electric vehicle (EV) Time-of-Use Energy-Saving Program lets you charge your EV at a time convenient for you.

How it works

- Charging is available 24/7.
- Energy rate varies based on time of day EV is being charged.
 - Rates are lowest overnight, from 10 p.m. to 5 a.m., and highest during peak hours, from 5 p.m. to 10 p.m.
 - Visit whe.org/electric-vehicle-charging-program for the most current rates.
- Energy rate is not subject to Power Cost Adjustment (PCA).
- May require a separate meter socket to be installed on the outside of home.
- The EV must have a minimum of 4.5kW charger rating to qualify.
- Requires Electric Vehicle Supply Equipment (EVSE) nema-rated Level 2 dedicated outlet or hardwired Level 2 wall mounted charging station.

See how the Time-of-Use charging program helps you save

Try our calculator to see how much you'll save when you switch from a gas or diesel vehicle to an EV - and find out how long it'll take to charge it!

You can also learn more about reducing your environmental impact, view available EV models, and learn more about charging station options.

How to enroll

1. Fill out online form or call us at (763) 477-3000 to discuss program details.
2. Schedule a time to pick up equipment.
3. Contact an electrician to receive a quote for the installation of your Level 2 charging station and metering equipment.
4. Install charging station & metering equipment.
5. Complete state electrical inspection within 30 days of installation.
6. Notify WH that installation is complete. WH will do an ESP inspection. Rates and rebates will not be applied until the final inspection is complete.
7. Submit required rebate paperwork if installing a new hardwired wall mount charging station.
8. We'll activate your Time-of-Use rate and process your bill credit.
9. Loving the program? Refer a friend!

2026 REBATE INFORMATION

Energy-Saving Program (ESP) rebate: up to \$500

Enrollment in the Time-of-Use (TOU) EV charging program is required to receive a rebate.

Rebates are available on new 240 volt, wall-mounted, hardwired Level 2 charging station only. Rebates will be given as a credit on your WH account.

Charging stations for battery electric vehicles (BEVs) qualify for a rebate up to \$500; **NEW for 2026: charging stations for plug-in hybrid vehicles (PHEVs) qualify for a rebate up to \$150.**

Rebate forms may be downloaded at whe.org.

Rebates are paid on a first-come, first-served basis. Terms and conditions are subject to change.

Please allow six to eight weeks for rebate processing after ESP installation and inspection.

Learn more by talking to a WH representative at (763) 477-3000 or visit WH's website at whe.org.

Program information applicable through 12/31/2026

Programs, rates, and rebate amounts are not guaranteed and may be adjusted in the future.
